

Science Chick

-presents-

CHEMISTRY!

Yeah.
Whatever.

So here's the deal. The world is made of stuff. Your mission is to find out what stuff is made of, how it interacts with other stuff, and what we can do with it.

Why? Because it's cooler than playing Minecraft with a deadmau5 soundtrack.

Well, almost that cool.

Smells
baaaaaaad ☹️

Good observation, Zombie Rabbit. Let's classify this matter before you eat it.

Matter is anything that has mass and volume, in other words, is stuff that takes up space.

So, is this matter an element, compound, homogeneous mixture, or heterogeneous mixture?

No can tell. Not know difference. Hungry now. Eat now? Eat now?
